This rigging guide is designed to assist you when selecting a TT ChinlockZ / SnakelockZ weedless jighead to suit your chose ZMan soft plastic. The 'chin lock' keeper has been designed to lock your soft plastic onto the jighead.

TT ChinlockZ / SnakelockZ

Available in a 'Finesse' version built on a fine wire, Mustad black nickel, chemically sharpened hook that is ideal for finesse applications and when maximum penetration is needed on light lines and with light drag settings.

Also available in a heavy / extra heavy wire version for maximum stopping power when dealing with large, aggressive predatory species and heavy cover.

ChinlockZ / ChinlockZ Finesse

An unweighted option for fishing the surface or on a dead slow sink over and into structure.

ChinlockZ SWS

The SWS stands for Snagless Weight System, a belly weighted version that offers additional casting weight, keeps the plastic and creates a slow, natural, horizontal sink. ChinlockZ SpinZ features the belly weight along with a belly mounted blade for added flash and vibration.

Snake EyeZ / SnakelockZ / SnakelockZ Finesse

Features a free-swinging, interchangeable front head weight, attached via an in-built stainless steel wire for strength. Mix and match your head weights and hook sizes to fish to fish a variety of plastics across a wide range of depths. Snake EyeZ are a painted version with large eyes, designed to match or contrast your chosen soft plastic.
